To: Vemula Chenna <Chenna\_Vemula@cat.com>; Jason Cook <COOK\_JASON\_G@cat.com>; Brian Rossi <Rossi\_Brian@cat.com>; Senthil Arasankuppam <Arasankuppam\_Senthil@cat.com>; Sairaja Challagulla <Challagulla\_Sairaja@cat.com>;

I have validated that Chenna and Sai now have reader in all accounts, tied to their admin cws.

Thanks,

Kameron

**Subject:** RE: Scout2 - Access requirements to cloud resources

After a bit of discussion with Creighton and Brian we have agreed to simply provide the Sairaja and Chenna the reader role for all AWS accounts. This should enable the guys to have read access to all of the services below and negate the need for this meeting.

Thanks,

*Jason*

**Subject:** RE: Scout2 - Access requirements to cloud resources

I apologize...I have a conflict at this time. Below are the requirements that Sairaja and Chenna will need access to accomplish. These are the final "non-custom" requirements on Pat's checklist that are not covered by Scout2 or something that CSIRT is monitoring for.

Trusted Advisor

Remove all unused IAM access keys that have not been used for 30 days or since creation

#### CloudWatch

Monitor existing roles for unapproved changes.
Ensure alerts are in place for any role changes
Build alerting that triggers when any role changes
Monitor that alert is in place on all AWS accounts for role changes.
Repond to the alert that role changes occurred
Ensure alerts are in place to report any network gateway changes.
Build alerting that triggers when there are network gateway changes.
Ensure alerts are in place for any scheduled key deletions
Ensure alerts are in place to report any changes to AWS Config
Build alerting that triggers when there are changes to AWS config
Monitor that alert is in place on all AWS accounts for changes to AWS config
